Installation:

Mount to studs in wall using drywall screws through at least every third groove and into every stud. Masonry walls should be furred-out or studded to make a solid base for the panels. Mount bottom panel first if 2 - 48" h panels are to be stacked.

Note: When installing panels next to each other in a continuous row, put the end with a small mark next to the side that does not have any marks. Each panel has one end that has a small black mark and one end that is blank. Top and bottom edges of 3" o.c. panels have half-grooves. When joined, a fully functional groove results.

Cutting: With a hand power saw, use fine plywood blade and cut from back to avoid chipping laminate surface.

Product Information:

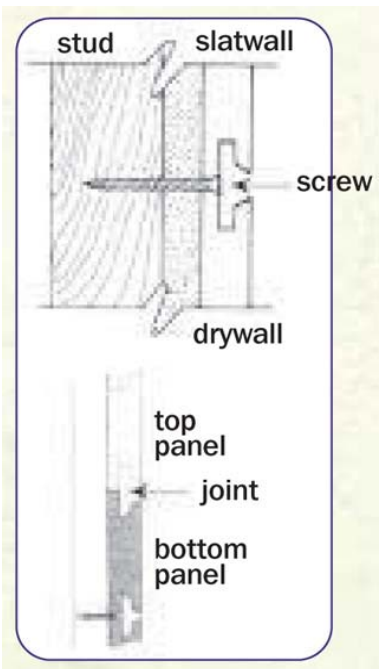

Panel Specifications: Constructed of 3/4" thick Medium Density Fiberboard (MDF) with 48 lb. core density and an internal bond strength of 125 lb. per sq. inch. Panels are cut with industry stand "T" grooves spaced 3" on center.

Size: 4'H x 8'W panels are cut with half-groove edges to create a complete "T" groove when stacked.

Hanging Strength:

While MDF panels with 125 psi-average lb. strength have excellent structural qualities, a panel's hanging strength is also affected by other factors. It becomes lower as space between grooves decreases and is affected by how and where the load is placed. For example, the farther from the panel face a product is hung, the less weight the panel will support. For best results, shelf brackets should be spaced 12" apart. Also, hanging strength with 6" of the edge is only 2/3 that of the rest.

IF HANGING STRENGTH IS AN ISSUE, CONTACT US FOR DETAILED ASSISTANCE

OUTRIGGER SYSTEMS

Are Perfect for any Wall!

7' Tall. Extends 15 1/2" out from wall. Chrome.
Outriggers are a popular way to fixture any wall. Minimal amount of fastening with maximum amount of usable space. Support is on the floor not on the walls. Use any 1/2" slotted hardware: hangrails, shelves, cross bars and face outs. Install outriggers on center, up to 4' apart to accommodate whatever fixture that you choose

All outriggers have universal slots, 1/2" - 1" o.c. on surface facing wall.

LIGHTING OPTIONS

Our Regu-LiteSM system uses standard T-12 bi-pin fluorescent lamps. It is a self-contained system and does not require remote ballast/transformer. The Regu-LiteSM fixture is the most economical broad light illumination source we offer.

The Maxum-LiteSM fixture uses state-of-the-art twin-tube compact fluorescent lamps. A self-contained system it offers our finest, brightest ambient light source. It is energy efficient, has excellent color rendition and each lamp is rated at a 10,000 hour life.

The Halo-LiteSM halogen/incandescent lighting system is the diamond of our line with low voltage, remote transformer system, Halo-LiteSM features 2W halogen bulbs, the finest light source for diamonds, precious gems, gold and platinum.

Halo-Lite'sSM fixture shell features an ultra-thin profile, swivel mount adjustment and UL listed glass light shields.

Our Halo-SpotSM halogen spotlight is the ideal lighting source for excellent illumination for upright displays, wall cases, towers and custom wood cases. Developed for its durability and value, this halogen spot is UL listed and has been designed with fixture cabinetry adaptation in mind.

STOCKROOM SHELVING

Excalibur commercial grade shelving is versatile, durable, easy to install and extremely cost-effective. Our galvanized steel, pre-assembled uprights and one-piece shelves eliminate the need for additional hardware (clips, rivets, rails and support brackets). Shelving is fully adjustable on 2" tab spacing and simple to reconfigure as needs change. Our system is available with either solid, sustainable pine or rust proof, galvanized steel shelving and is offered in a wide range of sizes and component options to meet any design requirement.

Additional Accessories

Hardboard back panel
Galvanized steel kick plate
Plastic mesh backing
Steel floor brackets
